EDUCATION

University of California, Berkeley

Bachelor of Arts, Physics and Computer Science

June 2020 – May 2024

Berkeley, CA

Cumulative GPA: 3.824

Coursework: Machine Learning, Neural Networks, Discrete Math, Probability, Linear Algebra, Data Structures

Activities: Traders at Berkeley, Student Association for Applied Statistics (SAAS), Capital Investments at Berkeley

EXPERIENCE

DeepMind Technologies Ltd.

Incoming Core Research Engineering Intern

Fall 2022

London, UK

Two Sigma Investments, LP

Quantitative Research Intern

May 2022 - August 2022

New York City, NY

Statistical techniques for equity clustering

Lawrence Berkeley National Laboratory

Machine Learning Researcher

January 2021 – Present

Berkeley, CA

Deep learning for pion reconstruction in particle physics collision events in collaboration with the CERN ATLAS group

Applied graph neural networks and data engineering to high dimensional data to improve network learning efficiency

Discovered models for classification of pions with 5x better background rejection than traditional hand-tuned models

Voloridge Investment Management, LLC

Quantitative Research Intern

May 2021 – August 2021

Jupiter, FL

Portfolio holdings inference of non-transparent funds using statistical and machine learning methods

Reduced dimensionality of securities universe tenfold using correlations, regressions, and feature selection techniques

Applied portfolio constraints via modified LASSO and Ridge regressions in a convex optimization problem

AI Dynamics Inc.

Software Engineering Intern

August 2020 – January 2021

Bellevue, WA

Developed a Python framework to deploy proprietary data modeling software to AWS EC2 using the Boto3 API

Saved 8+ hours per build iteration by automating the entire testing pipeline for the NeoPulse API on AWS Instances

Microsoft Corporation

Software Engineering Intern

June 2019 – August 2019

Redmond, WA

Developed internal desktop applications for the Windows Data Science team with 50+ users using C# and XAML

Designed and maintained backend SQL database tables and implemented queries and REST API endpoints

PROJECTS

Two Sigma Halite AI Programming Challenge

Bronze Medal: Ranked in the top 6% out of 1138 submissions on the global Kaggle leaderboard

Implemented creative algorithmic pathfinding and decision policies in a Python agent against other players

Google Trends Financial Modeling

Used Google Trends data to predict ETF price movements, earning 42% returns per annum in backtesting

Implemented EDA, feature engineering, modeling, and backtesting in Python with Pandas, Scikit-learn, NumPy

Berkeley SAAS Data Science Consulting

Orbital Insight - Missing object interpolation for cloudy satellite imagery using geospatial and time-series techniques

ProducePay - Feature importance analysis and predictions for terminal and shipping price quotes of produce

Berkeley Trading Competition

Planned and moderated Traders at Berkeley's first 100-contestant West Coast Trading Competition

Developed 2 turn-based market making games with a Python Flask backend and ReactJS frontend

Citadel West Coast Regional Datathon

Quantified the effectiveness of government interventions on COVID-19 rates in Europe

SKILLS

Software Languages

Python, R, Java, C#, SQL, HTML/CSS/JavaScript

Tools

NumPy, Pandas, Scipy, Sklearn, Jupyter, Linux, Windows, VS Code, Git

Interests

Table Tennis, Tennis, Cycling, Badminton
