EDUCATION

University of California, Berkeley

Bachelor of Arts, Physics and Computer Science

June 2020 – May 2023 Berkeley, CA

chetor of Aris, I hysics and Computer Science

Cumulative GPA: 4.0

Coursework: Computer Programs (Python), Multivariable Calculus, Algorithms, Quantitative Finance Activities: Student Association for Applied Statistics, Traders at Berkeley, Capital Investments at Berkeley

EXPERIENCE

Voloridge Investment Management, LLC

May 2021 – August 2021

Research Intern

Jupiter, FL

Inferred portfolio holdings of non-transparent funds using statistical and machine learning methods
Implemented feature selection algorithms and various forms of regressions in Python with Pandas, NumPy, and sklearn

Lawrence Berkeley National Laboratory

January 2021 - Present

Undergraduate Researcher

Berkeley, CA

Worked as apart of the Nachman Group within the Physics Division Machine Learning Group Researched graph neural networks for pion identification problems with the ATLAS detector at CERN Implemented models for classification of pions with 5x better background rejection than hand-tuned models

AI Dynamics Inc.

August 2020 – January 2021

Software Engineering Intern

Bellevue, WA

Developed a Python framework to deploy model-building software to AWS EC2 using the Boto3 API Saved 5+ hours per iteration by automating the entire testing pipeline for the NeoPulse API on AWS Instances

Microsoft Corporation

June 2019 – August 2019

Software Engineering Intern

Redmond, WA

Developed an internal Windows desktop application for the Windows team with 50+ users using C# and XAML Set up backend SQL database tables with relevant queries and REST APIs

Used agile methodologies (scrum) with a small team to coordinate workflow and iterative development

PROJECTS

Berkeley Trading Competition

Planned and moderated Traders at Berkeley's first 100-contestant West Coast Trading Competition Developed 2 turn-based market making games with a Python Flask backend and ReactJS frontend

Citadel West Coast Regional Datathon

Modeled the effect of non-pharmaceutical interventions on COVID-19 reproduction rates in 31 European countries

Google Trends Financial Modeling

Used Google Trends data to predict NASDAQ price movements, earning 42% returns per annum in backtesting Implemented EDA, feature engineering, modeling, and backtesting in Python with Pandas, Scikit-learn, NumPy

Berkeley SAAS Kaggle Competition

1st place solution in the Fall 2020 Berkeley Student Association for Applied Statistics internal Kaggle competition Predicted 2017 NYC real estate sale prices using a Keras neural network in Python, scoring a RMSE of 3340572

Two Sigma Halite AI Programming Challenge

Bronze Medal: Ranked in the top 6% of 1138 submissions on the Kaggle global leaderboard Implemented creative algorithmic policies in a Python agent to compete in the Halite IV simulation environment

SKILLS

Software LanguagesPython, R, Java, C#, SQL, HTML/CSS/JavaScriptToolsJupyter Notebook, Linux, Windows, VS Code, GitInterestsTable Tennis, Tennis, Cycling, Martial Arts
