EDUCATION

University of California, Berkeley

June 2020 - May 2023

Bachelor of Arts, Physics and Computer Science

Berkeley, CA

Cumulative GPA: 4.0

Coursework: Intro to Computer Science, Multivariable Calculus, Programming in R, Quantitative Finance

Activities: Student Association for Applied Statistics (SAAS), Traders at Berkeley

EXPERIENCE

Lawrence Berkeley National Laboratory

January 2021 - Present

Undergraduate Researcher

Berkeley, CA

Deep learning for pion identification and energy calibration with the ATLAS detector at CERN

Researching neural networks for classification of pions with 5+ times better background rejection than hand-tuned models

AI Dynamics, Inc.

August 2020 – January 2021

Bellevue, WA

Software Engineering Intern

Developed a Python framework to deploy model-building software to AWS EC2 using the Boto3 API Saved hours per iteration by automating the entire testing pipeline for the NeoPulse API on AWS Instances Worked in a small team with a high degree of autonomy

Microsoft Corporation

June 2019 - August 2019

Redmond, WA

Software Engineering Intern

Developed an internal tool for the Windows team with 50+ users using C# and XAML

Collected and analyzed user sentiment and application usage data to eliminate potential biases

Maintained SQL database tables with relevant queries and REST APIs

Used agile methodologies (scrum) with a small team to coordinate workflow and iterative development

PROJECTS

Berkeley SAAS Fall 2020 Kaggle Competition

December 2020

1st place solution for the Fall 2020 Berkeley SAAS CX Kaggle Competition

Predicted 2017 NYC real estate sale prices using a Keras neural network in Python, scoring a RMSE of 3340572

Google Trends Financial Modeling

December 2020

Used Google Trends data to predict NASDAQ price movements, earning 42% returns per annum in test data Implemented EDA, feature engineering, modeling, and backtesting in Python with Pandas, Scikit-learn, NumPy

Two Sigma Halite AI Programming Challenge

June 2020 – September 2020

Bronze Medal: Ranked in the top 6% of 1138 submissions on the global leaderboard

Implemented creative algorithmic policies in a Python AI to compete in the Halite IV simulation environment

Yearbook 2020 June 2020 - July 2020

Developed a web app for 250+ students and graduates to virtually sign yearbooks during the quarantine Implemented an HTML/CSS/JavaScript client and a Google Firebase backend for image processing and storage

SKILLS

Python, R, Java, C#, SQL, HTML/CSS/JavaScript, LATEX Software Languages

Tools Jupyter Notebook, Linux, Windows, VS Code, Git

Languages English, Mandarin, Cantonese, German

Interests Table Tennis, Tennis, Cycling, Wushu and Lion Dance
